

### **2.2.1: The institution assesses the learning levels of the students and organises special Programmes to cater to differential learning needs of the student**

Initially the university regularly assesses the learning level of the students against the program objectives. Right from day one, as the saying goes first impression is best impression. Teachers will be interacting with students on the day of counseling cum admissions. Based on their performance at UG level their conversation with the teachers will frame their own assessment parameters about the students. After the admission process is completed, Student Induction program "SPANDANA" (Daughters Day) is organized by the University for all the freshers. Honorable Vice Chancellor will welcome the students. The heads of various units will speak on facilities available (Library, Sports, Health Center, Hostel, Scholarship, Grievance cells, etc.) in the university for pursuing PG programmes. At the department level students are informed about the programme specific outcomes and opportunities after successful completion of the programme. as a general practice before the commencement of teaching of any course, course teacher will interact with students to ascertain their background subject stream, medium of education aptitude for the current program, aspirations area of interest their learning needs and skills moreover each faculty during the class hours identify the slow or advance learner by interacting with them. During the course of time a systematic evaluation process is used to assess the learning level of the students

During their third semester, students are encouraged to take up summer projects to inculcate research orientation and practical awareness so that they conveniently take up project work/field work under teacher supervision during their fourth semester as a part of their academic curriculum. Students carry out a substantial individual project in their final year of study i.e. fourth semester. Each project is supervised by a member of faculty, and assessed via written reports and presentations.

Slow learners and advanced learners are identified through continuous assessment in terms of seminars, assignments, tutorials, tests, etc. The teachers, as their first responsibility towards slow learners, build up confidence among these learners and make them believe that they are no less than others and come up. Counseling is also provided by the Counselor to students Encouraging words and phrases are used to bring a positive impact on the slow learners and thereby boost them to perform better. Special sessions are organized by the mentors to make them join the main stream. Fast learners are encouraged to take up internship, research projects, and software development assignments. They are involved in brain storming activities. Advanced students are encouraged to help the slower students too, thus increasing the overall speed that the class is mastering new concepts.

Special coaching sessions/tutorial sessions are conducted at department levels to bridge the gap between the slow learners and advanced learners. Critical topics are re-explained for better understanding. Slow learners are provided with additional laboratory time by the departments to understand and implement the practical's assignments under the supervision of course teachers. Motivational classes are conducted to improve the mental ability of students to analyze problems and to encourage students to regularly attend classes. Appropriate counseling with additional teaching eventually helps the slower learners to join the stream of fast advanced learners.

A walk through this beautiful wooden walkway amidst the lush green Mangrove trees is one of the beautiful ways to enjoy nature and also helps in calming your mind. Its the best place to spend 1 to 2 hours easily. Moreover Mangroves are always green irrespective of the season , they are salt tolerant, helps in filtering out the heavy metals from water, and prevents erosion in coastal areas.

Sharavathi Kandla Mangrove boardwalk is approx. 3 km from Honnavar city, right opposite to the eco beach. While driving from Honnavar to Bhatkal, Eco Beach is on the right side and for the Mangroves you have to take left turn.

We started our journey at 5 am with D.R.T travellers and reached at 9:30 am in Belgaum, we move to **NITM** (National Institute of Traditional Medicine Belgavi) at 10:27 am

In that firstly we went to the museum of Ethanomedicinal plant of Western ghats ,Guided by,Dr.Manoj sir,

The resource person gave the tremendous knowledge on the medicinal plants of Western ghats along with Endemic medicinal plants.

In that museum, near about 10000 different variety of seeds collection, bark of trees, roots, stem, leaves, with high medicinal plants of Western ghats.

Even we got the information about Red list of medicinal plants.

  
Co-ordinator

Sir gave lecturer about a day on marine treasurer on flora and fauna ,got plenty knowledge on nectons, phytoplankton, zooplankton,even got the caption on fishermen and sales man.

The marine life is an underwater museum still a waiting it's vistor we got a knowledge of scuba diving,how the pressure is applied on coronary artery,when we come out from High pressurized water of ocean.

A wonderful interaction we have done with prof.we got the plenty of knowledge on marine life where everyone need of to enjoy the marine life.

Later,vothe of thanks done by Samiya my friend,

Co-ordinator
