

2.3.2: The institution adopts effective Mentor-Mentee Schemes to address academics and student-psychological issues.

Yes, the University practices mentor – mentee program as it firmly believes that this program is an essential component for a successful career of a student. It is conducted to help the students to strengthen their varied capabilities and to build an interpersonal relationship between the faculties and students. Mentoring-Mentee System is a Structured Programme carried out as follows ➤ Each faculty member (Permanent/Guest Faculty) is the mentor of a group of students depending on the strength of students allocated to him/ her by the Head of the Department. Those faculties will continue to be the mentors for the same group of students till their Graduation/Post Graduation ➤ The teacher mentor collects personal information from the ward without touching sensitive issues or forcing any information out of the wards and then provides the needed counseling to the wards. ➤ Critical issues are brought to the notice of the Head of the Department. ➤ The mentor meets the wards informally at least twice a month outside class hours as well and guides them regarding their career options and personal issues. ➤ A documented record of the mentoring process is maintained by the mentor teacher and the Head of the Department for reference purposes. Mentor shall maintain a log book and also the mentee. The mentor-mentee shall submit a yearly mid-review report and a final report shall be submitted after the end of Graduation/Post-Graduation Programs. Stages of Mentoring: Stage 1: Initiation Mentor initiates the mentoring process in that the initial contact and ice-breaking is taken up. The general interaction that comprises of information on family background, educational history and records of the same, strengths, struggles and weaknesses is understood by the mentor and mentor reaches out his personality to the mentee. Stage 2: Cultivation The mentor and mentee enter in to mentoring relationship. Based on the understanding that the mentor would have gathered, he identifies key areas for improvement and together they lay out route map for effectively dealing with the issues. Mentor provides information on various schemes and topics that could eliminate the weaknesses and together they are actively involved in learning various aspects: mentor, learns about how best to see his mentee improve, and mentee, in all aspects suggested by the mentor. Stage 3: Assessment and avenues Progress of mentee in terms of learning, overall performance and progressive transformations are looked in to by the mentor. Through the assessment, recorded in suitable documents, the mentor-mentee interaction using cause and effect technique are used to arrive at future course of actions for aspects that have not yet been accomplished. If the previously targeted ones have been accomplished then through repetition of the process, new ones are arrived at.
